DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 17-20 rejected under 35 U.S.C. 102(b) as being anticipated by Fukuda (US 6,676,549).

Fukuda discloses detecting the angular position of said at least one gear (col. 2 lines 11-25); controlling change of position of said element for transmitting motion with respect to said at least one gear depending on the detected angular position (col. 5 lines 20-25); providing sensor means (18) for detecting the angular position of said at least one gear 28; and selectively activating said sensor means according to a command request for changing the position of said element for transmitting motion with respect to said at least one gear (col. 5 lines 54-57, it is an inherent feature that the controller would activate the sensor according to a command request to initiate a shift, since the sensor data is used to evaluate the rotation of the sprockets to determine if and when to activate the derailleur, col. 5 lines 14-25).

Re claims 17-20, Fukuda teaches a process for controlling when gear shifting occurs in a transmission of a cycle having at least one gear sprocket, the process comprising the steps of: assigning said at least one gear sprocket at least one given angular position in which shifting is facilitated (col. 6 line 65-col. 7 line 7); providing a

sensor (18) to detect said angular position of said at least one gear sprocket in which shifting is facilitated (col. 5 lines 10-14); and selectively activating said sensor according to a command request to initiate a shift (col. 5 lines 54-57, it is an inherent feature that the controller would activate the sensor according to a command request to initiate a shift, since the sensor data is used to evaluate the rotation of the sprockets to determine if and when to activate the derailleur, col. 5 lines 14-25).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 2, and 5-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,634,971. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variants in the breadth and scope of the claims.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
